~~*~*~*~*~*~*~*~*

Just a reminder for the Lake Ontario WebEx tomorrow at 10am. Conference call number and WebEx link are included in the email below.

Dear Community Leader:

On behalf of William Nechamen, Chief of the Floodplain Management Section at New York State Department of Environmental Conservation (NYSDEC) and the Federal Emergency Management Agency (FEMA) Region II Senior Engineer, Paul Weberg, your attendance is cordially requested at the Lake Ontario Watersheds, New York Discovery WebEx Meeting. This is the beginning of an interactive planning process that should result in new watershed-wide Risk Mapping, Assessment and Planning (RISK MAP) and Flood Insurance Rate Map products.

As you may be aware, FEMA and the NYSDEC are coordinating a Risk MAP project for communities within the Lake Ontario contributing watersheds, including your community. FEMA's Risk MAP program is designed to deliver quality data that increases awareness of flood risks and leads to mitigation activities which reduce the potential loss of life and property. To achieve this goal, NYSDEC and FEMA are working with communities within the Lake Ontario watershed to determine if additional local floodplain and flood hazard risk data are available to provide for the most accurate identification of flood hazard risk and flood mapping. To learn more about FEMA's Risk MAP program, please visit <http://www.fema.gov/rm-main>.

On Tuesday August 13 at 10am, NYSDEC and FEMA will hold a Discovery Meeting WebEx for watershed stakeholders introducing the Discovery project concepts, to discuss the project time line and upcoming meetings.

The purpose of the Discovery meeting is to review any information previously provided by communities, state and regional agencies, and local stakeholders, discuss your community's floodplains and floodplain management activities, mitigation plans and projects and flood risk concerns, and to provide additional feedback for FEMA to consider when developing Risk MAP products for your community, including the development of new Flood Insurance Rate Maps (FIRMs). In addition to updated FIRMs, flood risk mapping projects also include the development of easy-to-use risk assessment tools and data where appropriate. Other Risk MAP activities may involve mitigation projects or planning, communication and outreach support, and other related efforts that reinforce a community's flood resiliency.

The WebEx will be held:

Date: **Tuesday August 13, 2013**

Time: **10am – 12pm**

To join the online meeting

1. <https://dewberry.webex.com/dewberry/j.php?ED=219185452&UID=483037262&PW=NMTTRIMGY4MjJi&RT=MIMxMQ%3D%3D>
2. If requested, enter your name and email address.
3. If a password is required, enter the meeting password: W@t3R13
4. Click "Join".

To join the audio conference:

Dial in: 1-888-330-9552

Participant Code: 3423711

Kindly confirm your community's attendance by accepting or declining this invite by **Monday August 12, 2013** by emailing Rachael Herman (rherman@dewberry.com) and Kelli Higgins-Roche (kahiggin@gw.dec.state.ny.us) Please extend this invitation to community leaders, emergency managers, GIS specialists, and local planners in your jurisdiction.

It is extremely important that a representative(s) from your community attend this WebEx, since this will be the community's opportunity to learn about the Risk MAP program and provide local input to the Lake Ontario Discovery Project. If you have any questions, please contact NYSDEC floodplain management staff at 518-402-8185 or at floodpln@gw.dec.state.ny.us.

We look forward to your participation,

Rachael Herman, CFM

Who's Involved

■ Project Team

- NYS DEC
- Dewberry

■ State partners and officials

- FEMA
- NOAA Coastal Services Center
- USACE
- USGS
- Local and Regional Agencies

RiskMAP
Increasing Resilience Together

Great Lakes
Coastal Flood Study

greatlakescoast.org

Purpose of This Meeting

- Provide an overview of FEMA's RiskMAP Discovery process
- Review data collected and identify data needs
- Identify path forward for Stakeholder involvement
- Solicit input and feedback on local issues and concerns

Risk MAP Program Overview

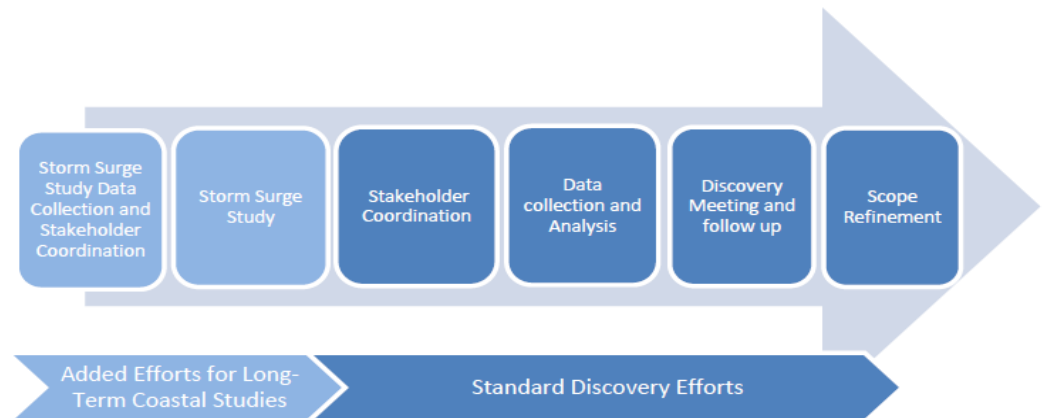

- Risk MAP
 - Mapping – Flood hazard and risk identification
 - Assessment – Risk assessment tools
 - Planning – Hazard mitigation planning
- Risk MAP Vision
 - Deliver quality data
 - Increase public awareness of flood risk
 - Encourage local/regional actions that reduce risk

Discovery Process Overview

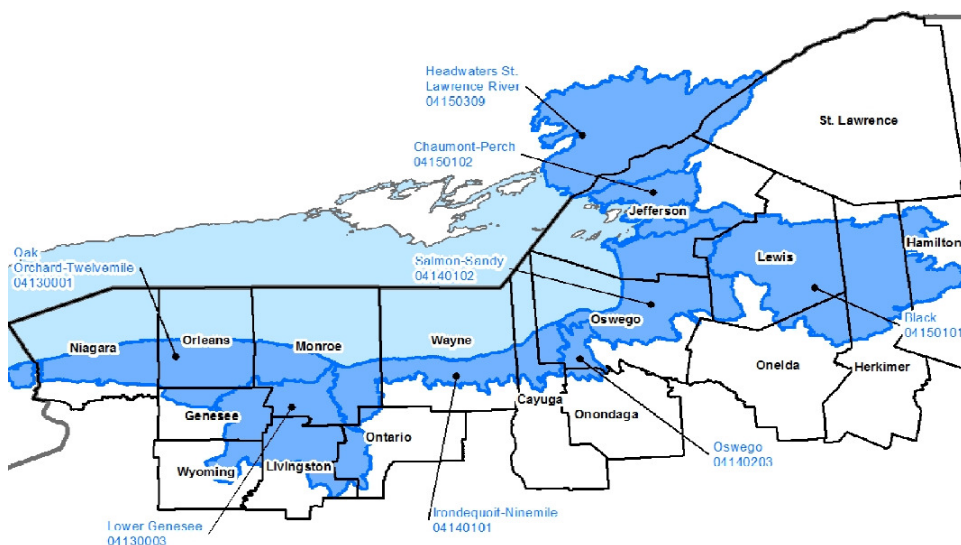

- Discovery is a collaborative process for data collection and analysis with the goal of initiating flood risk discussion:
 - Data and Projects
 - Historical flooding information
 - Existing flood hazard data
 - Areas of significant bluff erosion
 - Mitigation activities and strategies
 - Hazard risk assessments, for example, vulnerable assets
 - Collaboration
 - Communities
 - Regional planning entities
 - Non-governmental organizations
 - State agencies
 - Other Federal agencies

Study Area

- 8 Watersheds
- 17 Counties

County	Effective FIRM Date	Watershed Annualized Loss (Estimated in Thousands \$)
Cayuga	8/2/2007	\$35,000
Genesee	1979-1988	\$461,000
Hamilton	1984-1986	\$3,000
Herkimer	1980 - 2002 Prelim 9/30/2011	\$203,000
Jefferson	1977-2002 Prelim 4/30/2012	\$1,726,000
Lewis	1976-2000	\$1,360,000
Livingston	1977-2010	\$459,000
Monroe	8/28/2008	\$8,469,000
Niagara	9/17/2010	\$139,000
Oneida	1985 - 2001 Prelim 9/30/2011	\$117,000
Onondaga	1979 - 1999 Prelim 6/30/2008	\$2,000
Ontario	1977-2004	\$214,000
Orleans	5/1/1978-6/8/1984	\$122,000
Oswego	6/18/2013	\$422,000
St. Lawrence	1979-1998	\$66,000
Wayne	1977-1996	\$1,367,000
Wyoming	1977-1992	\$833,000

Data Collection

- **Background Data:** Census, Transportation, State & Federal lands, Stream Gages, Erosion Rates, Topo & Bathymetry
- **Flood Data**
 - FIRMs, DFIRMS, FIS, CRS class
 - Watershed Boundaries and Streams
 - Repetitive Loss data
 - Flood insurance policies and claim information
 - Letters of Map Amendment and/or Letters of Map Revision
 - Clusters of LOMCs
- **Dams (GIS and Dam Specific Reports)**
- **Federal and State Disasters**
- **Additional Studies:**
 - Average Annualized Loss (AAL) information
 - FEMA-approved Hazard Mitigation Plans
 - Community Plans, Ordinances, Programs to alleviate flooding or manage stormwater

Local Data Worksheet

■ Data Worksheet to request:

- *Base Map Data*
 - *Topography/Bathymetry*
 - *Imagery*
- *Coastal Data*
- *Other Data*
- *Historical Flood Data*
- *Risk Assessment*
- *Flood Mitigation Information*
- *Community Plans and Projects*

 **FEMA** 

Community Risk Map Worksheet

Please provide the following information Date:

County Name:	Community Name:	
Your Name:		
Your Address:		
Daytime Phone:	E-mail:	
Contact Preference: <input type="checkbox"/> E-mail <input type="checkbox"/> Phone <input type="checkbox"/> Mail		

The Federal Emergency Management Agency (FEMA) is undertaking a new Risk MAP analysis in your watershed. Risk MAP is Mapping, Assessment and Planning, and is an initiative to provide communities with flood information and tools that they can use to enhance mitigation and reduce flood risks. Risk MAP products include updated Flood Insurance Rate Maps as well as non-regulatory flood risk data on a watershed basis. The Department of Environmental Conservation is cooperating with FEMA to help develop Risk Map background and scoping data through a process known as Discovery.

Discovery is the initial phase of a FEMA Risk MAP project, in which FEMA and NYS seeks to learn about the unique issues in a watershed. The Discovery process provides for data collection within a watershed. Through this process FEMA and NYS are trying to gather data that identifies flood risk, historical flooding information, existing flood hazard data and mitigation activities. All of these items will be incorporated into a final scope of work for the Risk MAP project. It is important to be aware that the Discovery process does not necessarily mean a new flood study will take place – rather it is a process by which FEMA learns about the issues in a watershed and prioritizes the need for new studies.

In order to develop preliminary information in advance of an in-person Discovery meeting, we respectfully request that you take a little time to fill out the attached information.

Please provide as much information as possible. If you have questions about the Discovery process or about completing this worksheet, please contact Kelli Higgins-Roche.

Once you have completed this worksheet, please return the form to:

NYSDEC
Attn: Kelli Higgins-Roche
615 Broadway
Albany, NY

We value information important for flood risk analysis, and we want to hear from you, especially if you are a resident population particularly concerned with flooding and flood risk.

Which city groups or watershed groups do you think we should add to our list of groups for the project? Please provide names and any other information that would be helpful.

2. Coastal Data (Great Lakes or Tidal Coastal Communities Only) - Is any of the following information available as either GIS data layers or in some other format?

Coastal Data Category	File Type	Contact for Data
Bathymetry (topography along the shoreline and waterline)	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)	
Location of Coastal Structures such as sea walls or groins	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)	
Wave or tidal gauge data	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)	
Location of wind stations	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)	
Location of beach nourishment / dune restoration projects	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)	
Proposed inland limit of the primary frontal dune	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)	

3. Other Data - Is any of the following information available as either GIS data layers or in some other format?

Other Data Category	Response Details and Contact
Location of flood control structures (dams, floodwalls, levees)	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)
<i>If available, who maintains the flood control structures?</i>	
Location of any dams within your community.	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)
<i>If available, who constructed and maintains the dam structures?</i>	
Local survey data.	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)
<i>If available, include contact and the type of survey data collected.</i>	
Local flood gauge data or rain gauge data.	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)
<i>If available, include contact and the type of data collected.</i>	
Relevant reports / studies that include hydrology, hydraulics, survey or LIDAR.	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (ie. Shapefile)
<i>If available, include contact and the type of data collected. When was the study completed? Who conducted the study? (i.e. Developer, DOT, USACE, NRC)</i>

Discovery Meeting Invitees

- Compiled list of community and county officials, including:
 - Chief Executive Officers (i.e., Mayor, Supervisor)
 - Building, Zoning, and Planning Officials
 - Local Floodplain Administrators
 - City and County Engineers
 - Conservation Districts
- Need your help to identify others who should be invited to Discovery Meetings
 - Watershed Associations
 - Others

Project Schedule

- Today
 - Discovery Overview
- Upcoming WebExs
 - Mid-September
- In person Meetings
 - Mid-Late October
- Final Discovery Report and Maps – March 2014

Next Steps

- We will provide:
 - Summary of Today's Meeting
 - Document discussions and outcomes
 - Action items
- Work with you to:
 - Complete the local data survey
 - Verify and identify community contacts to attend Discovery Meetings
 - Determine locations and dates for Discovery Meetings

- **Interactive Meeting Invites with data collection worksheet**
 - Emails sent: September 5, 2013
 - Hard Copy mailed: September 6, 2013
- **Interactive Meeting**
 - Today

Discovery Process Overview

Discovery is a collaborative process for data collection and analysis with the goal of initiating flood risk discussion:

- Data and Projects
 - Historical flooding information
 - Existing flood hazard data
 - Areas of significant bluff erosion
 - Mitigation activities and strategies
 - Hazard risk assessments, for example, vulnerable assets
- Collaboration
 - Communities
 - Regional planning entities
 - Non-governmental organizations
 - State agencies
 - Other Federal agencies

Discovery Results and Products

- **Final Discovery Reports by Watershed**
 - Comprehensive report for documenting discovery process
 - Includes background information and data analysis, meeting agenda, sign-in sheets, discussion topics, decisions made, etc.
- **Final Discovery Maps**
 - Includes feedback from participants
 - Visual representation of meeting outcomes

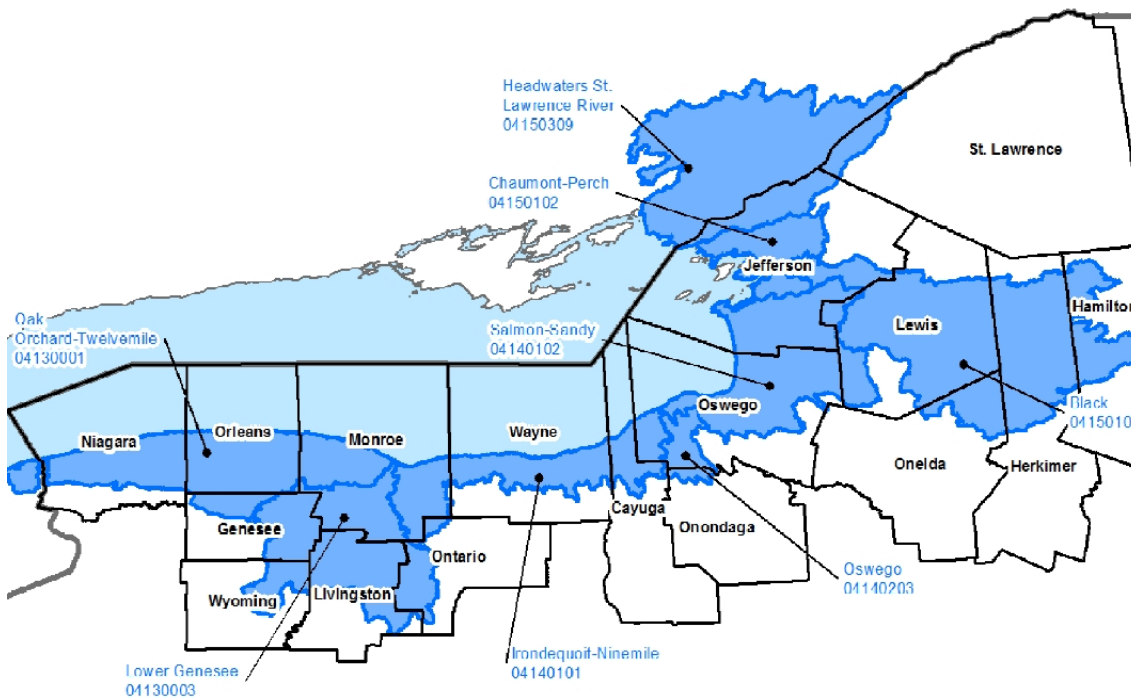

Discovery and Flood Mapping

- Discovery helps inform whether a Risk MAP project will occur in the watershed
- Specific areas are prioritized based on flood hazard study needs and available funding
- Within watersheds studied, not all streams and communities will receive new studies or maps
- All Risk MAP communities will receive updated flood risk assessments, but not necessarily new regulatory products

Study Area

- 8 Watersheds
- 17 Counties

County	Effective FIRM Date
Cayuga	8/2/2007
Genesee	1979–1988
Hamilton	1984–1986
Herkimer	1980 – 2002 Prelim 9/30/2011
Jefferson	1977–2002 Prelim 4/30/2012
Lewis	1976–2000
Livingston	1977–2010
Monroe	8/28/2008
Niagara	9/17/2010
Oneida	1985 – 2001 Prelim 9/30/2011
Onondaga	1979 – 1999 Prelim 6/30/2008
Ontario	1977–2004
Orleans	5/1/1978–6/8/1984
Oswego	6/18/2013
St. Lawrence	1979–1998
Wayne	1977–1996
Wyoming	1977–1992

Great Lakes Coastal Flood Study: Overview

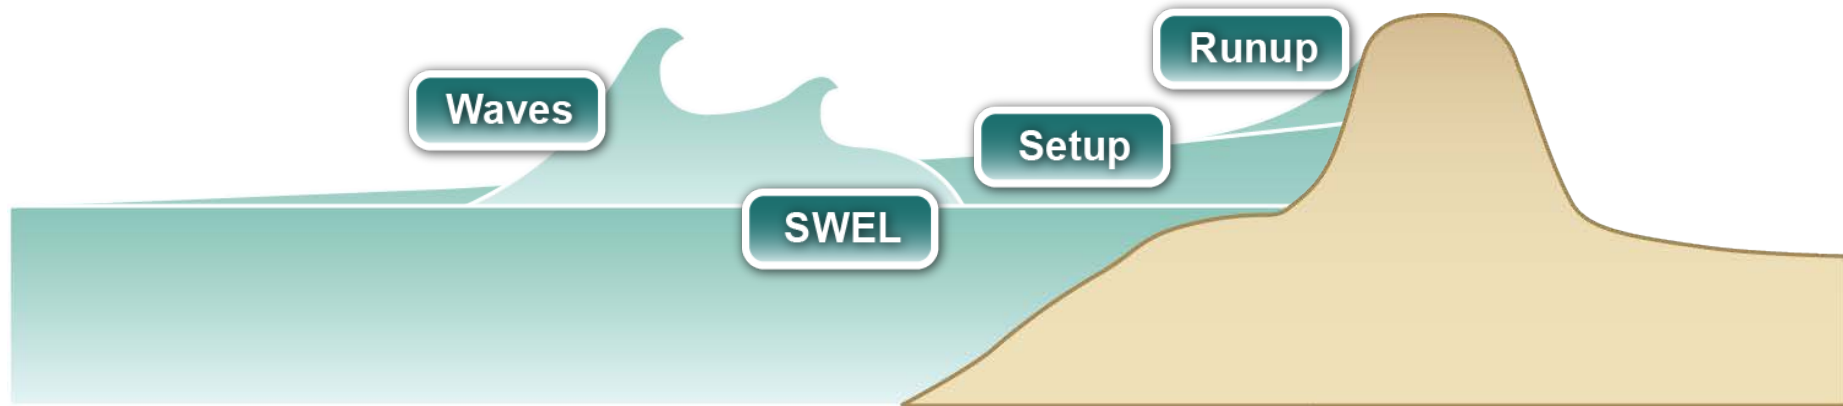

- Current FIRMs outdated due to the age of data & methodologies – many date to 1970s
- Changes in NFIP policies and methodologies have since occurred, creating need for an update
- New methods have been developed
 - Includes basin-wide water surface grids and storm sampling, built from continuous record of 50 years of meteorological, water level, and ice field data (1960 - 2010)
 - Methods will be incorporated into official FEMA guidance – Appendix D.3
 - Demonstration projects were conducted in several lakes to test and improve new methodology described in FEMA guidance
- Study will include entire U.S. Great Lakes coastline

Findings: Changing BFEs

Base Flood Elevation on FIRM now includes 4 components:

1. Wave height above storm surge (stillwater) elevation
2. Storm surge stillwater elevation (SWEL)
3. Amount of wave setup
4. Wave runup above storm surge elevation (where present)

Local Data Worksheet

Data Worksheet to request:

- *Base Map Data*
 - *Topography/Bathymetry*
 - *Imagery*
- *Coastal Data*
- *Other Data*
- *Historical Flood Data*
- *Risk Assessment*
- *Flood Mitigation Information*
- *Community Plans and Projects*

FEMA
Community Risk Map Worksheet

Please provide the following information		Date:
County Name:	Community Name:	
Your Name:		
Your Address:		
Daytime Phone:	E-mail:	
Contact Preference: <input type="checkbox"/> E-mail <input type="checkbox"/> Phone <input type="checkbox"/> Mail		

The Federal Emergency Management Agency (FEMA) is undertaking a new Risk MAP analysis in your watershed. Risk MAP is Mapping, Assessment and Planning, and is an initiative to provide communities with flood information and tools that they can use to enhance mitigation and reduce flood risks. Risk MAP products include updated Flood Insurance Rate Maps as well as non-regulatory flood risk data on a watershed basis. The Department of Environmental Conservation is cooperating with FEMA to help develop Risk Map background and scoping data through a process known as Discovery.

Discovery is the initial phase of a FEMA Risk MAP project, in which FEMA and NYS seeks to learn about the unique issues in a watershed. The Discovery process provides for data collection within a watershed. Through this process FEMA and NYS are trying to gather data that identifies flood risk, historical flooding information, existing flood hazard data and mitigation activities. All of these items will be incorporated into a final scope of work for the Risk MAP project. It is important to be aware that the Discovery process does not necessarily mean a new flood study will take place – rather it is a process by which FEMA learns about the issues in a watershed and prioritizes the need for new studies.

In order to develop preliminary information in advance of an in-person Discovery meeting, we respectfully request that you take a little time to fill out the attached information.

Please provide as much information as possible. If you have questions about the Discovery process or about completing this worksheet, please contact Kelli Higgins-Roche.

Once you have completed this worksheet, please return the form to:

NYSDEC
Attn: Kelli Higgins-Roche
Floodplain Management
625 Broadway
Albany, NY

We need your information important for flood risk analysis, and we want to ensure that the most vulnerable populations particularly concerned with flooding and emergency preparedness are included in our efforts.

If you are a community group or watershed group you think we should add to our list, please let us know by completing this form. Please provide names and any contact information you have available.

Phone	E-Mail

Are you using GIS technology in your community?

FEMA

2. Coastal Data (Great Lakes or Tidal Coastal Communities Only) - Is any of the following information available as either GIS data layers or in some other format?

Coastal Data Category	File Type	Contact for Data
Bathymetry (topography along the shoreline and waterline)	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy	
	<input type="checkbox"/> Digital (i.e. Shapefile)	
Location of Coastal Structures such as sea walls or groins	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy	
	<input type="checkbox"/> Digital (i.e. Shapefile)	
Wave or tidal gauge data	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy	
	<input type="checkbox"/> Digital (i.e. Shapefile)	
Location of wind stations	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy	
	<input type="checkbox"/> Digital (i.e. Shapefile)	
Location of beach nourishment/dune restoration projects	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy	
	<input type="checkbox"/> Digital (i.e. Shapefile)	
Proposed inland limit of the wetland frontal dune	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy	
	<input type="checkbox"/> Digital (i.e. Shapefile)	

3. Other Data - Is any of the following information available as either GIS data layers or in some other format?

Other Data Category	Response Details and Contact
Location of flood control structures (berms, floodwalls, levees)	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (i.e. Shapefile)
If available, who maintains the flood control structures?	
Location of any dams within your community.	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (i.e. Shapefile)
If available, who constructed and maintains the dam structures?	
Local survey data.	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (i.e. Shapefile)
If available, include contact and the type of survey data collected.	
Local flood gage data or rain gage data.	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (i.e. Shapefile)
If available, include contact and the type of data collected.	
Relevant reports/studies that include hydrology, hydraulics, survey or LIDAR. If available, include contact and the type of data collected. When was the study completed? Who conducted the study? (i.e. Developer, DOT, ULACE, NRC)	<input type="checkbox"/> Not Available <input type="checkbox"/> Hard Copy <input type="checkbox"/> Digital (i.e. Shapefile)

RiskMAP

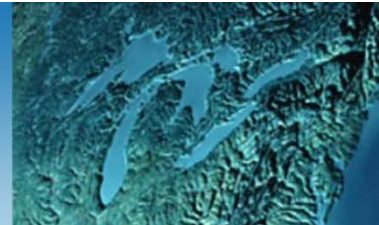

Increasing Resilience Together

Local Data Worksheet

- **Completed Worksheets:**
 - City of Watertown (Jefferson County)
 - Town & Village of Naples (Ontario County)
 - Town of Ohio (Herkimer County)
 - Village of Fairport (Monroe County)
 - Genesee County
 - Lewis County
 - Monroe County
 - Oswego County

- **Questions on how to Complete Worksheet?**

Floodplain Mapping Needs

- **Coordinated Needs Management Strategy (CNMS)**

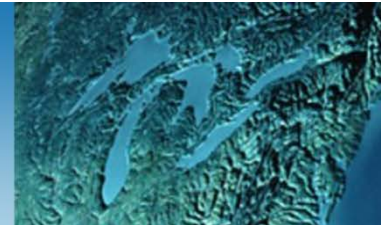

- **Interactive Mapping**
 - Areas within your community where the FEMA FIRMs are not accurate
 - Significant changes have impacted maps (ie. culvert replacement)

 - Flooding problem spots not currently shown on FEMA maps

Interactive Mapping

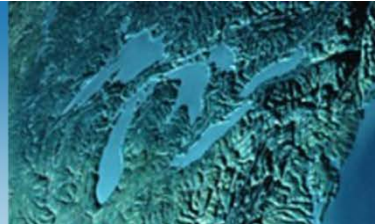

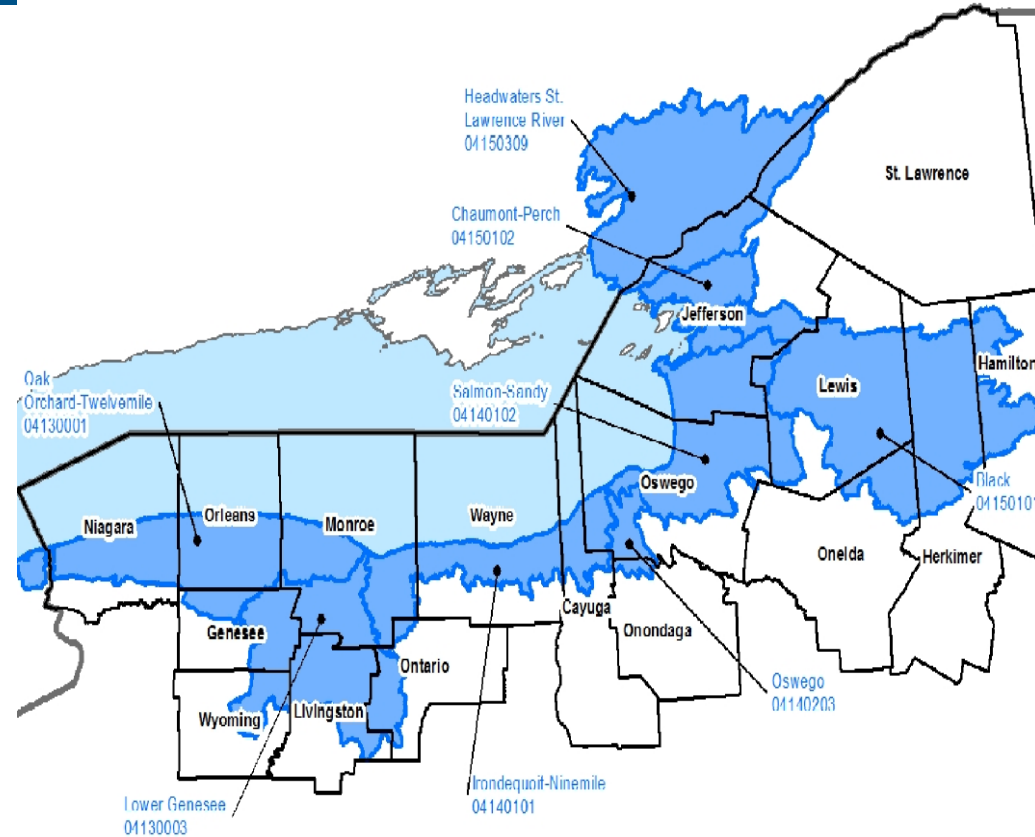

- Launch ArcMap

Project Schedule

- Today
 - Interactive web-ex
- In person Meetings
 - Mid-Late October 2013
- Final Discovery Report and Maps – March 2014

Next Steps

- **We will provide:**
 - Summary of Today's Meeting
 - Document discussions and outcomes
 - Action items
- **Work with you to:**
 - Complete the local data survey
 - Verify and identify community contacts to attend Discovery Meetings
 - Determine locations and dates for Discovery Meetings

Appendix C: Kickoff Meeting Notes

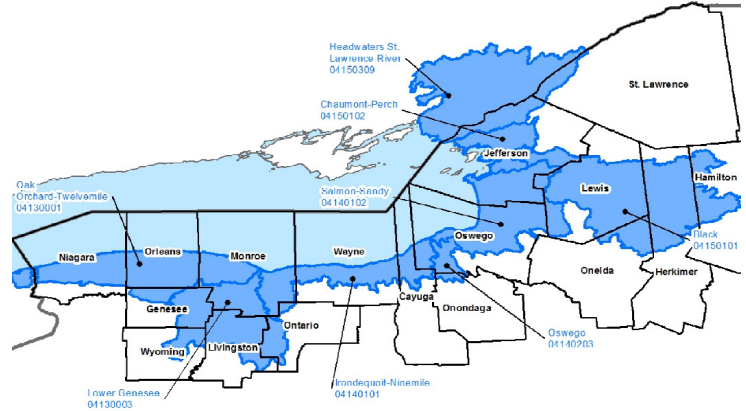

Lake Ontario Watershed Discovery Kick-off Meeting

Meeting Minutes from WebEx No.1 Series
Sessions for the week of August 9, 2013

Prepared by Dewberry and NYS DEC

Stakeholder Participation:

Email invites were sent out to 246 communities and 16 counties within the Lake Ontario watershed study area. Participants for each of the five WebEx sessions are shown in the table below.

Tuesday 10am (8/13/2013)	Wednesday 10am (8/14/2013)	Thursday 10am (8/15/2013)
<p><u>Jefferson County</u> Andy Nevin (Jefferson Co. Planning Department, Senior Planner) Joseph Plummer (Office of Fire & Emergency Management, Director) Cindy Shaw (Town of Ellisburg, Zoning Officer) Marlene Lennox (Town of Hounsfield, Zoning Officer)</p> <p><u>Oswego County</u> John Donohue (Town of Hastings, Town Engineer)</p> <p><u>St. Lawrence County</u> John Tenbusch (St. Lawrence Co Planning Office, Planner)</p> <p><u>Additional Stakeholders</u> Kathleen Bertuch (Central NY Regional Planning) Jennifer Harvill (Tug Hill Commission)</p>	<p><u>Hamilton County</u></p> <p><u>Herkimer County</u> Jessica Breiten (Herkimer-Oneida Counties Regional Planning)</p> <p><u>Lewis County</u> Nichelle Billhard (Lewis Co SWCD)</p> <p><u>Oneida County</u></p> <p><u>Additional Stakeholders</u> Laura Ortiz (Buffalo USACE)</p>	<p><u>Genesee County</u> Felipe Ultramari (Genesee Co, Director of Planning) Gary Fink (Town of Bergen, Planning Board Chair) Mike Tucci (Village of LeRoy, Village Trustee)</p> <p><u>Livingston County</u></p> <p><u>Wyoming County</u></p> <p><u>Additional Stakeholders</u> Kristin Campbell (Herkimer-Oneida Counties Regional Planning) Laura Ortiz (Buffalo USACE)</p>
<p>Tuesday 1pm (8/13/2013)</p>	<p>Wednesday 1pm (8/14/2013)</p>	
<p><u>Cayuga County</u> Randall Lawrence (Town of Sterling, Supervisor) June Ouellette (Town of Sterling, Planning Board Chair)</p> <p><u>Onondaga County</u> Jessica Lyons (Cornell Cooperative Extension, Team Coordinator)</p> <p><u>Ontario County</u> Al Benedict (Town of Victor, Code Enforcement Officer)</p>	<p><u>Monroe County</u> Don Peterson (Cornell Cooperative Extension) Thomas Goodman Justin Cole (GIS) Jon Mann (City of Rochester) Tim Keef (Town of Brighton) Michael Guyon (Town of Brighton, Town Engineer) David Lindsay (Town of Chili-Commission of Public Works) Gary Tajkowski (Town of Greece) Katherine Perkins (Town of Greece)</p>	<p><u>Participants from Planning Team:</u></p> <p><i>Kelli Higgins-Roche (NYSDEC)</i> <i>Dave Sherman (NYSDEC)</i> <i>Robyn Boyd (Dewberry)</i> <i>John Licso (Dewberry)</i> <i>Rachael Herman (Dewberry)</i> <i>Christina Lindemer (Dewberry)</i> <i>Monica Davis (Dewberry)</i> <i>Andrew Martin (Dewberry-RSCII)</i> <i>Jana Green (Dewberry-RSCII)</i></p>

Tuesday 10am (8/13/2013)	Wednesday 10am (8/14/2013)	Thursday 10am (8/15/2013)
<p>Wayne County Ora Rothfuss (Wayne Co. Planning Department, Agricultural Development) Lindsey Gerstenslager (Wayne Co SWCD, District Manager) Roy Widrig (Cornell Cooperative Extension, Community Educator)</p> <p>Additional Stakeholders Laura Ortiz (Buffalo USACE)</p>	<p>Tongyen Li (Town of Greece) Steven Dufsen (Town of Greece) Fred Rion (Town of Greece) Amanda Detschner (Village of Barker) Ronnie Williams (Town of Penfield) Eric Williams (Town of Perinton) Rob Fromberger (Town of Pittsford, Town Engineer) Jason Kaluza (Town of Pittsford, Building Inspector) L. Kay Whamby (Village of Fairport) Michelle W (Village of Pittsford GIS) Will Barham(Village of Webster) Jake Swingly (Village of Webster) Michael Guyon Jayme Thoman</p> <p>Niagara County Jeffrey Glatz (Niagara County Manager)</p> <p>Orleans County</p> <p>Lewis County Jim Martin (Lewis Co. Emergency Management)</p> <p>Additional Stakeholders Laura Ortiz (Buffalo USACE) Stevie Adams (Nature Conservancy)</p>	

Meeting Minutes: (see link to PowerPoint presentation on last page)

FEMA is focused on updating the floodplain maps for coastal regions throughout the United States, and this includes all five of the Great Lakes. The Lake Ontario Watershed Discovery project is the beginning of an interactive process that results in a watershed-wide assessment of existing flood hazard mapping needs, existing information useful in updating the Flood Insurance Rate Maps (FIRMs) and ultimate recommendations for the development of updated Risk Mapping, Assessment and Planning (Risk MAP) and Flood Insurance Rate Map products. This first WebEx was to introduce the planning team, request feedback from the municipalities, Counties, and regional groups within the project area, and to determine what additional local floodplain and hazard risk data is available and should be included in the process.

The purpose of the Discovery meeting(s) is to review any information previously provided by communities, state and regional agencies, and local stakeholders, discuss your community’s floodplains and floodplain management activities, mitigation plans and projects and flood risk concerns, and to provide additional feedback for FEMA to consider when developing Risk MAP products for your community, including the potential development of new Flood Insurance Rate Maps (FIRMs) where needed.

The second series of WebEx/conference calls will take place in mid-September to discuss the Data Collection worksheet (Attachment to Minutes) and mapping needs within your community. We will also be scheduling several in-person Discovery Meetings within the Lake Ontario watersheds in late Fall. These meetings will review the information gathered from the Data Collection Worksheets and provide an additional opportunity for your community's feedback. Detailed information on these meetings will be sent to you and your community's representatives at a later date.

Comments from Meeting:

- Genesee County does not have digital maps so they often use the Q3 data to assist with determining where the floodplain is.
- Town of Stafford, in Genesee County, the center of the community is not mapped. Mapping is needed since there are unmapped flooding sources and a significant portion of the population lives within this unmapped area.
- LiDAR was recently flown in the northern two-thirds of Genesee County. The collection was used to map karst bedrock features.
- Tributary to Black Creek in the Town of Bergen (Genesee County) floodplain mapping stops at the Village/Town boundary. The mapped floodplain does not extend into the Town.
- Black Creek and Oatka Creek are completing Watershed Management Plans. Felipe Oltramari has additional contact information for these plans.
- Black River corridor in Lewis County was recently flown for LiDAR as part of a USDA NRCS project.
- In many Counties, a lot of bridge work is completed at the County level and often this information is not routinely shared with the localities and State.
- Wayne County is currently updating their Hazard Mitigation Plan.
- Cayuga Creek has a Watershed Management Plan and active watershed coalition.
- Onondaga County Cornell Cooperative Extension and Wayne County do not actively use their FEMA flood maps.

Questions from Meetings:

1. Why was the Seneca/Oneida River Basin not included in study?
 - a. In part, the project scope was determined on budget. The available funds did not allow for the inclusion of many watershed we would have liked to incorporate into this project. We recognize the need for a RiskMAP project in the Oneida Watershed and hope to complete Discovery there in the future.
 - b. We are planning to start the Seneca Watershed Discovery project following the completion of the Lake Ontario Watershed Discovery project. We anticipate reaching out to communities in the Seneca Watershed in early 2014.

2. What is the project schedule for updating the FEMA floodplain maps by watershed?
 - a. We anticipate communities directly on the Lake Ontario shoreline will receive preliminary FIRMs in approximately two years. We recognize there are needs further inland for all of the Lake Ontario watersheds. However, needs and community participation will largely dictate the likelihood that specific areas are prioritized. For watersheds that are prioritized for updated flood studies, NYSDEC and FEMA will work closely with the watershed communities to establish and scope of work and timeline for completion.

Stakeholders to Include:

The participants were asked if there were additional stakeholders that should be added to the list. Several participants suggested the Cooperative Extensions and Soil and Water Conservation Districts in each County be invited. It was also suggested the following stakeholders be added to the distribution lists:

- The Onondaga Planning and Environmental Health
- Finger Lakes Protection Alliance (FLPA)
- Northern Oneida County Council of Governments (NOCCOG)
- Black Creek Watershed Coalition
- Cayuga Creek Watershed Coalition

Schedule:

- WebEx #2 series: week of September 17 – 20, 2013
- October/November 2013: In-person community based meetings.

Meeting presentation materials available here:

Meeting Minutes: (see link to PowerPoint presentation on last page)

Background

FEMA is focused on updating the floodplain maps for coastal regions throughout the United States, and this includes all five of the Great Lakes. The Lake Ontario Watershed Discovery project is the beginning of an interactive process that results in a watershed-wide assessment of existing flood hazard mapping needs, existing information useful in updating the Flood Insurance Rate Maps (FIRMs) and ultimate recommendations for the development of updated Risk Mapping, Assessment and Planning (Risk MAP) and Flood Insurance Rate Map products. This second WebEx was to request feedback from the municipalities, Counties, and regional groups within the project area, and to determine what additional local floodplain and hazard risk data is available and should be included in the process.

Comments from Meetings

The purpose of the WebEx sessions was to review any information previously provided by communities, state and regional agencies, and local stakeholders, discuss your community’s mapped floodplains, mitigation plans and projects and flood risk concerns. The WebEx was also an opportunity for stakeholders to provide additional feedback for FEMA to consider when developing Risk MAP products, including the potential development of new Flood Insurance Rate Maps (FIRMs) where needed.

The second half of the meeting was interactive, with community maps shown on the meeting screen and participants discussing floodplain mapping needs within their communities. Floodplain mapping needs and areas of concern included: area that experience flooding, locations of bridge/culvert replacements, areas where FEMA maps are inaccurate or do not exist, etc. To further expand on this discussion, participants were asked to complete and return the data worksheets to supplement the interactive discussion.

The summary of the floodplain mapping needs have been catalogued in the table below and have been spatially identified (via ArcMap) in the FEMA needs database. At this time, some of the areas noted in the table are not complete descriptions of areas of concern. Completed data worksheets and the November in-person meetings will formalize the community needs.

County	Municipality & Representative	Interactive Mapping Areas & Concerns
Genesee County	City of Batavia Steven Mountain	<ul style="list-style-type: none"> Tonawanda Creek floods on Rt. 98 near the intersection of Walnut and Law and South of railroad to corporate limits and Lehigh Street.

County	Municipality & Representative	Interactive Mapping Areas & Concerns
Genesee County	Town of Batavia Steven Mountain	<ul style="list-style-type: none"> Several bridge replacements and business development in floodplains were noted and will be documented on data worksheet. At water treatment plant there is a jump in the H&H on current FEMA maps. This was investigated for submerged structure, didn't find anything. Currently looking for funding to locate the structure. Ice jams and debris frequently occur on Tonawanda Creek near Main Street/Rt.5 and South near Batavia Mobile Home. Erosion issues noted along Tonawanda Creek on Main Street North of Rt. 15 and Stegman Street
Hamilton County	Town of Inlet Aimee VanWie	<ul style="list-style-type: none"> No historical flooding has been documented. Along the Chain Lakes (Fourth Lake, Seventh Lake, Eighth Lake) and Rt 28 detailed studies are needed (no digital maps). The lake area is where the town population lives.
Herkimer County	Herkimer County Bob Vanderwalker	<ul style="list-style-type: none"> Agreed with all information stated for communities within Herkimer County.
Herkimer County	Town of Webb Andy Getty	<ul style="list-style-type: none"> No historical flooding has been documented. Most of the land is in state park hands. Shoreline of the Chain Lakes is heavily developed and the old maps are hard to read due to scale. Need to have established BFEs for larger water bodies such as Big Moose Lake and the Chain Lake, and the dam on Old Forge Pond. Currently the LOMCs are being used to better define BFEs for major water bodies. Van Dora Bridge was replaced by NYSDOT 20 years ago.
Herkimer County	Town of Ohio Jeff Green	<ul style="list-style-type: none"> Current maps are adequate for needs.
Jefferson County	Jefferson County Andy Nevin Michelle Bunny	<ul style="list-style-type: none"> Current flood maps are not really usable or useful (scale isn't zoomed in enough for detail); Andy Nevin to provide a general list of areas that need to be studies. Lots of development is occurring along the St. Lawrence River and Lake Ontario.
Jefferson County	Town of Ellisburg Cindy Shaw	<ul style="list-style-type: none"> Montario Point Road, West of Rt 3, has a lot of new construction. Would like mapping to show all the houses in or out of the floodplain
Jefferson County	Town of Henderson Eric Sheldon	<ul style="list-style-type: none"> Would like to know how far inland does the floodplain extend and how far from the mean high water marks.
Jefferson County	City of Watertown Curt Hawk Matt Owen	<ul style="list-style-type: none"> Need BFEs on the Black River at the intersection of Indiana and Huntington Street. Flooding issues all along the Black River throughout the extent of the city.
Jefferson County	Village of Clayton Geneva Phelps Miller	<ul style="list-style-type: none"> No historic flooding issues with the Village. There are several areas that have stormwater problems. Rachael to send shapefile for the watersheds that are part of the project
Lewis County	Lewis County Frank Pace	<ul style="list-style-type: none"> Would like to be involved and informed of all meetings and discussions
Lewis County	Town of Lowville Kathy Manning Joseph Phieffer	<ul style="list-style-type: none"> The Village of Lowville dumps snow in Mill Creek and results in flooding and ice jams within the Town. Throughout the town and county, farmers place fill in the floodplain. Laura Ortiz (USACE) will follow-up with Kathy on resources that can be used to address this issue.

County	Municipality & Representative	Interactive Mapping Areas & Concerns
Lewis County	Town of Martinsburg Terrence Thisse	<ul style="list-style-type: none"> Town received a lot of requests from homeowners regarding the need for flood insurance. Roaring Brook is currently a Zone A and needs to be studied in detail. Flooding issues are noted along the extent of the Black River.
Livingston County	Village of Dansville	<ul style="list-style-type: none"> Floodplain is not mapped between Dansville and Sparta. New/updated data in Sparta but stops at corporate limit with Dansville
Livingston County	Village of Nuda Heather Ferrero	<ul style="list-style-type: none"> Historic flooding issues along Kershequa Creek. Floodplain boundaries do not cover the entire extent of the Village includes the western portion of the Village from Rt. 408 West to Portage and Bailey for Kershequa Creek.
Monroe County	City of Rochester Dorraine Kirkmire	<ul style="list-style-type: none"> No issues with current mapping. Will have the City Floodplain Administrator review the data worksheet.
Monroe County	Monroe County Justin Cole	<ul style="list-style-type: none"> Most of the needs are along shoreline as a result of the age of LiDAR used in the mapping. Christina will follow-up with Justin with elevation information and modeling details for the 2008 DFIRMs.
Monroe County	Town of Brighton Michael Guyon	<ul style="list-style-type: none"> Stream restoration on Buckland Creek. High school in/out of the floodplain (want to discuss this), area is near Buckland Stream and "12 Corners". A lot residential and commercial development along I-590. University of Rochester project/development in West Brighton.
Monroe County	Town of Greece Gary Tajkowski	<ul style="list-style-type: none"> Town has a lot of development along the shoreline and is concerned with how the lake levels (IJC) will affect these properties.
Monroe County	Town of Henrietta Roland Osterwinter	<ul style="list-style-type: none"> The updated maps place residents within the floodplain with increased floodway along the Genesee River. Town has proposed development North of Rt 253 between West and East Stem Middle Branch Red Creek.
Monroe County	Town of Irondequoit Larry Heininger Pat Meredith	<ul style="list-style-type: none"> No significant development within Town; built out to capacity. Culvert work on Rt. 590. Differences in the elevation between Irondequoit and Webster cause issues with finished flood elevations. Some erosion issues along the bay Some flooding issues in the Town caused by storm water capacity
Monroe County	Town of Ogden Patrick Smith Dave Widter Jack Crook	<ul style="list-style-type: none"> No mapping between Washington Street/South of the canal (Hamlet of Adams Basin). There is flood study information available for this area Tributaries to Salmon Creek (contact Tom West). Southeastern portion of the Town, near Rt 33/Buffalo Road experiences development and the current maps are not correct.
Monroe County	Town of Pittsford Rob Fromberger Michelle Debyah	<ul style="list-style-type: none"> Town will complete data worksheet and include a map with areas of concern.
Monroe County	Town of Rush Richard Anderson	<ul style="list-style-type: none"> Culvert located at the intersection of Rt 15A and 251 needs to be replaced. This information has been submitted to NYSDEC at the map mod meetings.
Monroe County	Village of Spencerport Tom West	<ul style="list-style-type: none"> FEMA maps are accurate and support needs.
Niagara County	Niagara County	<ul style="list-style-type: none"> No updated/new H&H on streams draining to Lake Ontario during the map mod (2010) mapping project. County has issues with the accuracy of the LiDAR information.

County	Municipality & Representative	Interactive Mapping Areas & Concerns
Onondaga County	Onondaga County Don Jordan	<ul style="list-style-type: none"> Noted that they have concerns about the IJC and revisions to the maps
Ontario County	Ontario County Jeff Harloff Tom Harvy Chris Day	<ul style="list-style-type: none"> County will provide details on the data survey worksheet that will include maps and where As-built information is available. Bridge replacement on Factory Hollow at West Bloomfield and Rt.20 and in the Richmond Lake area. Bridge installation on Honeoye Creek & Mill Creek at Rt. 20, completed by NY DOT; there is also a weir/flood control structure present. Detailed study needed on Mud Creek in Bristol. Bridge at Rt 20 is being replaced. Significant flooding issues near intersection of Rt. 20 and Rt. 64. This is a zone A area with no BFE data and contains the Bloomsfield Reservoir used for recreation
Ontario County	Town of Naples Frank Mueller	<ul style="list-style-type: none"> Bridge replacements on the Southwest side of the Village of Naples along St. Rt. 21 and Rt.245. Town has detailed information for the Unnamed Stream just east of Town boundary (Community Park). Eelpot Creek near Rt 21 and Clark St DEC has lots of fill placed at Clark Street and Rt 21
Ontario County	Village of Naples Frank Mueller	<ul style="list-style-type: none"> Town has detailed information for the Unnamed Stream just east of Town boundary. Bridge replacement at the intersection of St. Rt. 21 and 53 and Rt. 21 and Main Street.
Ontario County	Town of Victor	<ul style="list-style-type: none"> Lots of development (mostly commercial) within the Town and surrounding county with several structures (bridges/culverts) modified. Will provide details on the data worksheet.
Orleans County	Orleans County	<ul style="list-style-type: none"> County has concerns about IJC being incorporated. Significant flooding comes from ditches (stormwater drainage concerns) in rural areas
Orleans County	Town of Albion Dan Strong	<ul style="list-style-type: none"> General quality of the flood maps for the town is poor.
Orleans County	Town of Clarendon	<ul style="list-style-type: none"> Participating NFIP community but maps have not been adopted
Oswego County	City of Oswego Anthony Leotta Bob Johnson	<ul style="list-style-type: none"> Would like more information on the accuracy of the LiDAR source that was used in the development of the FIRMs currently being issued as effective
Oswego County	Oswego County David Turner	<ul style="list-style-type: none"> County discussed concerns about the IJC lake level management plan not being accounted for during new mapping and has comments and questions regarding the FIRMS that are currently being issued.
Oswego County	Town of Hastings John Donohue	<ul style="list-style-type: none"> Hydrology for the area north of Oneida River, including Dry Bridge Creek and Elderberry Creek has not been updated since the 1970s. This area, South of central Square, is seeing new significant development.

County	Municipality & Representative	Interactive Mapping Areas & Concerns
Oswego County	Town of Scriba David Turner	<ul style="list-style-type: none"> Wine Creek (panel 278) was dredged and added 3ft to the depth; BFEs do not reflect this. There is higher ground along the south side of the stream with new development near Downy Drive. A portion of the creek was blasted out and a culvert was put in under Downy Drive (placed in the '90s); as-builts available. The FIS profile (pg. 139) depicts culvert under 104 as a 5 ft culvert but it is a 14ft arch culvert. Two culverts for Wine Creek were replaced in 1985 on City Line Road, between Albany and East Hall Road. As-builts available. Underground conduit for Harbor Book stretch through residential area from Oneida Street to reservoir.
Oswego County	Town of West Monroe Michael Yerdon Paul Baxter	<ul style="list-style-type: none"> Would like information on how to compute elevations in Zone A areas.
St. Lawrence County	Town of Hammond Jason Pfothenauer	<ul style="list-style-type: none"> Maps were rescinded in 1984. Community still participates in the NFIP but there are no identified SFHA or published maps.
St, Lawrence County	Town of Oswegatchie Tim Tuttle	<ul style="list-style-type: none"> Black Lake has no BFE established; lake levels vary 9 feet. Significant development all along the lake shore. Ice jams occur on the Oswegatchie River where the river flows down to St. Lawrence River. BFEs were developed from recent bridge work and there are ice marks on trees above that point.
St. Lawrence County	St. Lawrence County Jason Pfothenauer	<ul style="list-style-type: none"> The extent of the St. Lawrence River is seeing a lot of old and new structures applying for LOMCs.
Wayne County	Town of Clyde Thomas Sawtelle	<ul style="list-style-type: none"> Recurring flooding issues on Black Brook in the Galen area along Rt. 31. No mapped floodplain West of Maple Street. This area, Rt31 and old Rt 31 experiences flash flooding and has a pond that is not mapped.
Wayne County	Town of Williamson Kurt Allman Christine Albel Jayme Thomann	<ul style="list-style-type: none"> Flooding problems noted along boundary with Sodus on the Southeast border of town from unnamed Tribs of Salmon Creek. A lot of farmland that is controlled by culverts and the culverts are not maintained.
Wayne County	Village of Clyde Thomas Sawtelle	<ul style="list-style-type: none"> Built-up residential areas North of Rt. 31 and West of Duncan Street. This areas experiences regular seasonal flooding and has low-lying areas. No current FEMA floodplain West of Waterloo Street, Wayne Avenue near Rt. 414 and East to Galen, Sodus Street, South of Washington Street, and on Rt. 414 between Waterloo and Gravel Street. Small stream not shown on maps near Jenkins and Water Street. Low-lying areas noted south of Dezensg Street.
Wayne County	Village of Sodus Point Chris Turner Albert Hendrikse	<ul style="list-style-type: none"> Sodus Bay area near Shore Road, all the houses in this area are well above the water. Village has questions/concerns regarding insurance the how the BFEs will change in this area
Wayne County	Wayne County Bret DeRoo Frank Pace	<ul style="list-style-type: none"> County will work with others to fill out data survey. Rachael to send shape file for the watersheds that are part of the project
Wyoming County	Town of Middlebury Greg McKurth	<ul style="list-style-type: none"> Floodplains within the town are not mapped.

County	Municipality & Representative	Interactive Mapping Areas & Concerns
Wyoming County	Village of Wyoming Greg McKurth	<ul style="list-style-type: none"> History of flood events, albeit not recent, along Village Creek and Oatka Creek.
Wyoming County	Wyoming County Greg McKurth	<ul style="list-style-type: none"> Channel along railroad between Towns of Wyoming and Warsaw floods that impacts agricultural areas. Genesee River (Southeast portion of County) has erosion issues which create sediment deposits further downstream.

Questions from Meetings:

1. What is the project schedule for updating the FEMA floodplain maps by watershed?
We anticipate communities directly on the Lake Ontario shoreline will receive preliminary FIRMs in approximately two years. We recognize there are needs further inland for all of the Lake Ontario watersheds. However, floodplain mapping needs and community participation will largely dictate how specific areas are prioritized. For watersheds that are prioritized for updated flood studies, NYSDEC and FEMA will work closely with the watershed communities to establish a scope of work and timeline for completion.
2. How does the Lake Ontario analysis tie into the Coastal Hazard Erosion Mapping?
There is still discussion on going between FEMA and NYSDEC on how to possibly incorporate both sets of data.

Contacts for the in-person meetings:

We will also be scheduling several in-person Discovery Meetings within the Lake Ontario watersheds in November. These meetings will review the information gathered from the WebEx sessions, Data Collection Worksheets and provide an additional opportunity for your community’s feedback. The following participants volunteered to be considered the point of contact for facilitating the meetings to be held in the watershed in November:

- Cindy Shaw (Town of Ellisburg/Jefferson County)
- Michelle Bunny (Jefferson County)
- Dave Turner (Oswego County)
- Jeff Harloff/Tom Harvey (Ontario County)
- Frank Pace (Lewis County)
- Andrew Getty (Town of Webb/Herkimer County)
- Justin Cole (Monroe County)
- Roland Osterwinter (Town of Henrietta, Monroe County),
- Michael Guyon (Town of Brighton, Monroe County)
- Paul Wagner (Orleans County)
- Scott Rybarczyk (Niagara County – multiple towns)
- Bret DeRoo (Wayne County)
- Greg McKurth (Wyoming County SWCD)
- Steven Mountain (Town of Batavia, Genesee County)
- Heather Ferrero (Livingston County)

Completed Data Worksheets received to date:

- Cayuga County
- Genesee County
- Town of Inlet (Hamilton County)
- Town of Ohio (Herkimer County)
- Jefferson County
- Town of Cape Vincent (Jefferson County)
- City of Watertown (Jefferson County)
- Lewis County
- Town of Osceola (Lewis County)
- Monroe County
- Village of Brockport (Monroe County)
- Village of Churchville (Monroe County)
- Village of Fairport (Monroe County)
- Town of Henrietta (Monroe County)
- Town of Pittsford (Monroe County)
- Town of Ogden (Monroe County)
- Town of Somerset (Niagara County)
- Village/Town of Naples (Ontario County)
- Oswego County
- Town of Sodus (Wayne County)

Schedule:

- November 2013: In-person community based meetings.

Meeting presentation materials available here:

- https://www.rampp-team.com/documents/newyork/LakeOntarioWatershedDiscovery_2ndMeetingPresentation_09-19-2013.pdf

Attachments:

- Lake Ontario Watershed Discovery Data Worksheet (PDF)

FEMA

Discovery Meeting: Lake Ontario

FEMA REGION II

November 12-14, 2013 and November 19-21, 2013

Lake Ontario Contributing Watersheds

RiskMAP

Increasing Resilience Together

Introductions and Who's Here

Project Team

- ***FEMA Region II***
- ***Dewberry***
- ***New York State Department of Environmental Conservation***

Local Stakeholders Invited

- ***Local Community Officials***
- ***Non-Governmental Agencies***
- ***Private Sector***
- ***People/Organizations discussed during WebExs and on Data Worksheets***

Agenda

- **Introductions and Who's Here**
 - Purpose of this Meeting
- **Risk MAP Program Overview**
 - Discovery Process
 - Lake Ontario Coastal Study
- **Mitigation Planning and Grants**
 - Risk Communication
 - NFIP and Community Rating System
- **Next Steps**
- **Group Breakout Discussions**

Purpose of This Meeting

- Explain the Discovery process
 - Share your concerns about flood risk
 - Share any additional flood risk data you may have
- Discuss the Lake Ontario Coastal Flood Study
- Discuss how FEMA flood risk products can facilitate mitigation actions within your community

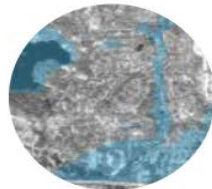

Shifting from MapMod to Risk MAP

- Map Modernization used increasingly-available technology to increase the quality, reliability, and availability of flood hazard maps and data
- It focused on digitizing maps to provide timely, accurate information to community planners

Risk MAP further enhances the maps, involves communities during the assessment and planning stages, and guides and encourages them to communicate risk to their constituents

Risk MAP = Risk Mapping, Assessment, and Planning

What is Risk MAP (Risk Mapping, Assessment and Planning)?

- Through collaboration with State, Local and Tribal entities, Risk MAP aims to deliver **quality data** that **increases public awareness** and leads to **action that reduces risk** to life and property.

- You can use Risk MAP tools and data to:

- Improve and implement your Hazard Mitigation Plans
- Influence decisions about development, ordinances, and flood mitigation projects
- Communicate with citizens about flood risk

Discovery Process

- **FEMA and communities “discover” and assess flood risk data**
- **Discovery Data Collection Period**
 - **Stakeholder coordination and data analysis**
- **Discovery Meeting**
 - **Initial Discovery Map**
- **Post-Meeting Review**
 - **Final Discovery Map and Discovery Report**

Discovery Products and Results

- **Discovery Report**

- Including summary of data, analysis, meetings, and action items or decisions

- **Discovery Map**

- Visual representation of meeting outcomes and feedback from stakeholders

- **Project Study Areas**

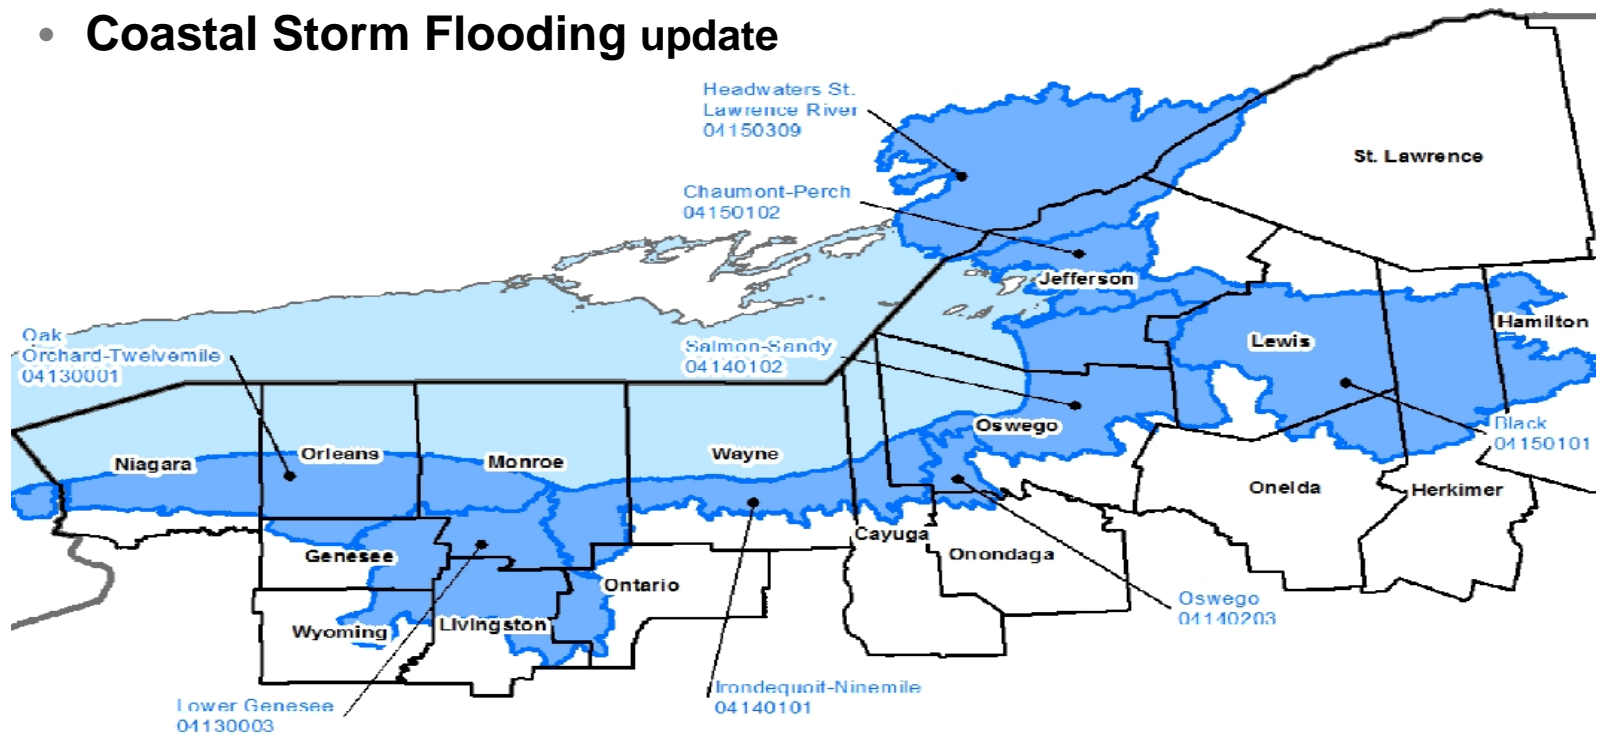

- **National Metrics**

Study Area

■ Lake Ontario Watersheds

- 8 watersheds
- 17 counties
- 246 Communities
- Coastal Storm Flooding update

Discovery Map: Cataloging Mapping Needs

Discovery Map: Cataloging Mapping Needs

Data Collection and Collaboration

- **Discovery is the process of data mining, collection, and analysis with the goal of investigating a flood risk or mitigation project or risk discussions within a watershed.**
- **The following data was researched and reviewed before the meeting:**

- CRS, NFIP status
- MNUSS –flood hazard mapping needs
- High Water Marks
- Dams and/or levees
- Mid-term Levee Inventory (MLI)
- Topo/Elevation Data
- Gages
- NHD streamline
- Various GIS data for the discovery products
- Structure Info (bridges, culverts)

- Average Annualized Loss data
- Repetitive Loss Data
- LOMCs
- Effective Data (FIS, DFIRM, FIRM)
- List of Communities & Contact Info
- Hazard Mitigation Plan (online)
- Hazard Mitigation Assistance Program grants received
- Individual or Public Assistance information
- Disaster history or history of disaster declarations

Sample of Data Collection Progress

Data Types	Deliverable/Product	Source
Average Annualized Loss Data	Discovery Map Geodatabase	Census 2010 and Hazus
Coordinated Needs Management Strategy	Discovery Map Geodatabase	FEMA
Declared Disasters	Community Fact Sheets	FEMA's "Disaster Declarations Summary"
Dams and/or Levees	Discovery Map Geodatabase	USACE NYSDEC
Demographics, Industry	Community Fact Sheet	Census Bureau, Hazard Mitigation Plans
Effective Floodplains: Modernized SFHAs	Discovery Map Geodatabase	FEMA's Mapping Information Platform
Coastal Gage Data	Discovery Map Geodatabase	USGS, NOAA CO-OPS
Insurance Policies	Community Fact Sheet	CIS
Letter of Map Change (LOMCs)	Community Fact Sheet (known clusters on Discovery Map Geodatabase)	FEMA's Mapping Information Platform
Repetitive Loss	Community Fact Sheet	CIS
Stream Gages	Discovery Map Geodatabase	USGS
Insurance Policies	Community Fact Sheet	CIS BureauNet

Sample of Data Collection Progress

Hazus-MH Average Annualized Loss (AAL)

FIPS	County	Building Loss (in thousands of dollars)	Contents Loss (in thousands of dollars)	Total Loss (in thousands of dollars)
36011	Cayuga	\$20,000	\$15,000	\$35,000
36037	Genesee	\$178,000	\$276,000	\$461,000
36041	Hamilton	\$1,000	\$2,000	\$3,000
36043	Herkimer	\$113,000	\$89,000	\$203,000
36045	Jefferson	\$961,000	\$751,000	\$1,726,000
36049	Lewis	\$837,000	\$496,000	\$1,360,000
36051	Livingston	\$234,000	\$214,000	\$459,000
36055	Monroe	\$3,420,000	\$4,819,000	\$8,469,000

Topographic Data

- Coastal data collected

Topographic Data continued

- Other LiDAR data

Data We Need from You

- **Areas of Concern**
 - Areas of recent or planned development
 - Areas of high growth or other significant land changes
- **Areas of historical flooding**
- **Other flood risks (high erosion areas, drainage issues...)**
- **Mitigation projects**
- **Your ideas about Risk MAP products and mitigation projects that may help your community**
- **Your ideas about other ways to increase your community's resilience from flooding**

To explain some of the actions that your community may take to reduce risk, we'll review mitigation grants and planning and participation in the NFIP program

Data Worksheet Feedback

- We need comments returned by December 31, 2013
- Digital comments can be submitted to:
 - kahiggin@gw.dec.state.ny.us
 - jehorton@gw.dec.state.ny.us
 - rherman@dewberry.com
 - rboyd@dewberry.com
- Written comments can be sent to the following:
Attention: Kelli Higgins-Roche

New Detailed Coastal Analysis in the Great Lakes

- **Current FIRMs may be dated due to the age of data & methodologies – many date to 1970s**
- **Changes in NFIP policies and methodologies have since occurred, creating need for an update**
- **Coastal analysis will include:**
 - Historical water level changes
 - Detailed assessment and modeling of wave conditions
 - Erosion analysis
 - Detailed modeling of wave runup
 - Coastal hazard mapping based on detailed modeling

Available Coastal Data

- **For the Coastal Study, the following data is currently available for use:**
 - LiDAR
 - NOAA Bathymetric Data
 - USACE Oblique Aerials
 - USACE Shoreline Classification

- **Data communities can submit for use:**
 - Coastal Structure data
 - More detailed topographic data
 - Detailed bathymetric data

Storm Surge Analysis and Stillwater Elevations

- **Stillwater elevations determined from results of surge modeling**
 - Storms run with water level that existed during event
- **Extreme value analysis used to determine the 1% coastal stillwater elevations**
- **Several scenarios of differing water levels and wave conditions tested for most conservative results**

Name	Methodology
Scenario 1	Maximum water level and associated wave height extracted from the iso-probability curve
Scenario 2	Maximum wave height and associated water level extracted from the iso-probability curve
Scenario 3	Combination of intermediate values extracted from the iso-probability curve
Scenario 4	1-percent-annual-chance exceedence value of water level, and expected wave height from the conditional probability distribution
Scenario 5	1-percent-annual-chance exceedence value of wave height and expected water level from the conditional probability distribution

IJC Lake Ontario – St. Lawrence River

- **Current FEMA regulations require the use of past and present conditions in coastal analysis and mapping**
- **Past shifts in water levels are included in coastal analysis and mapping**
- **Often storms coinciding with the largest coastal hazards are during winter months**
 - Water levels naturally lower
- **Currently in early stages of coastal analysis, closely observing the proposed changes**

Coastal Analysis Process

Erosion in the Great Lakes

- **USACE CSHORE model**
 - Applies real physics
 - Near-shore wave processes
 - Cross-shore sediment transport
 - Requires sediment grain size
 - Available data or estimated

Runup Modeling in the Great Lakes

■ USACE CSHORE model

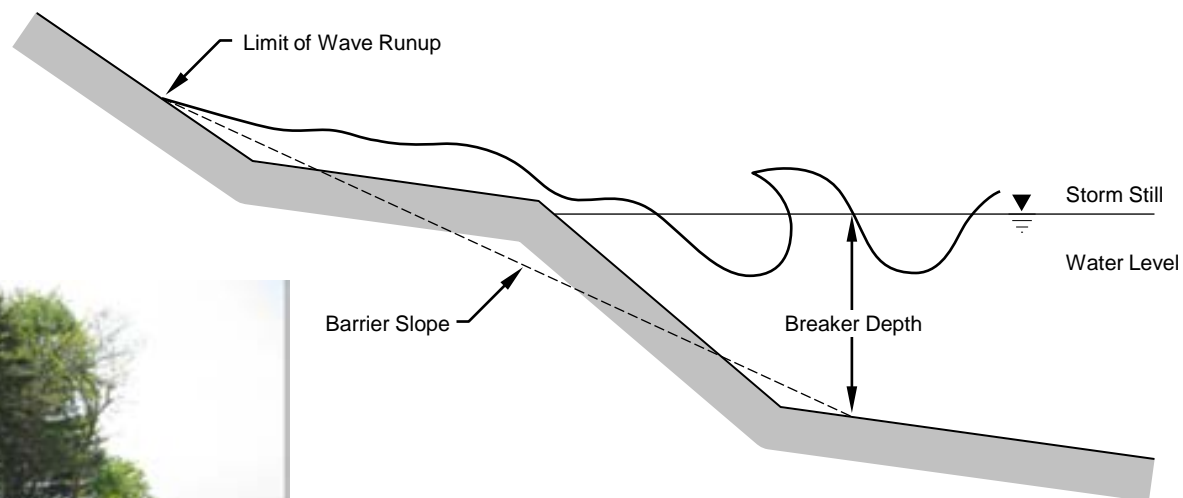

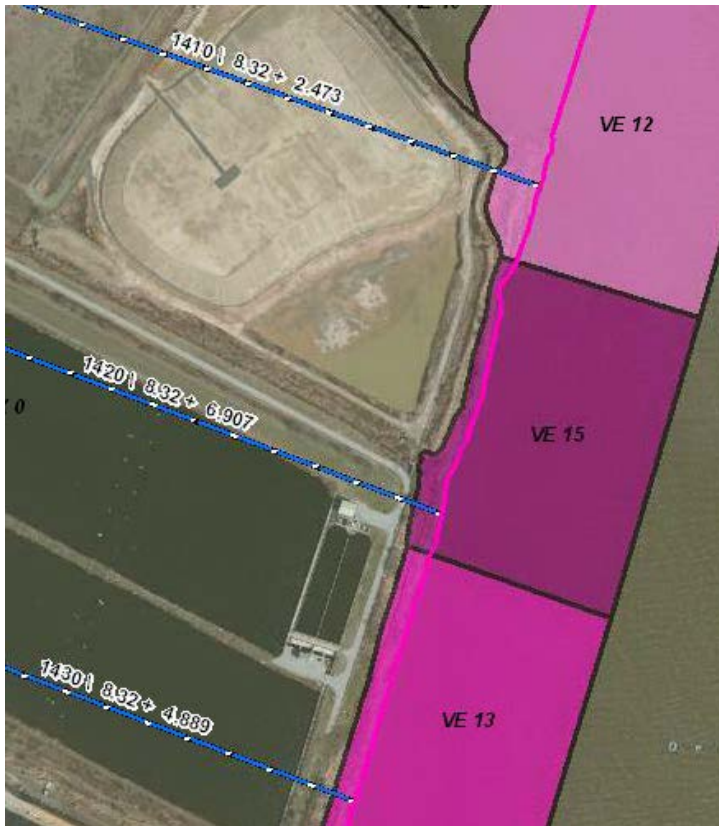

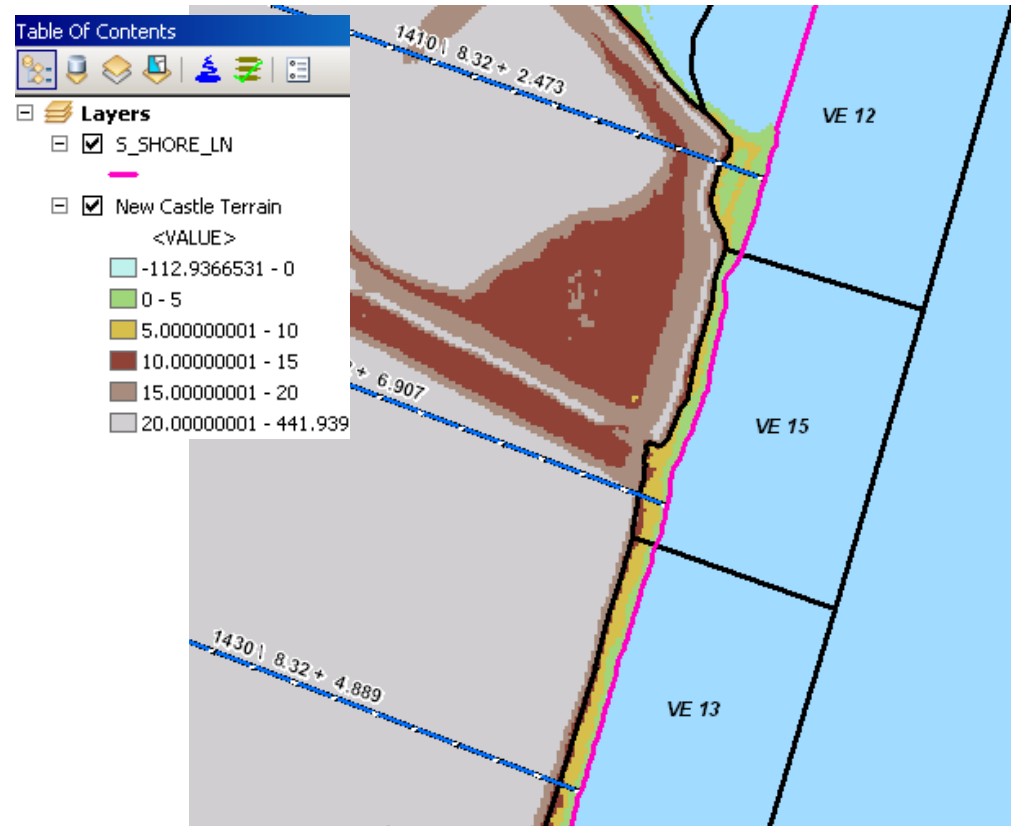

Figure D.3.5-5. Wave Runup Sketch

Wave Runup Mapping

How runup is mapped

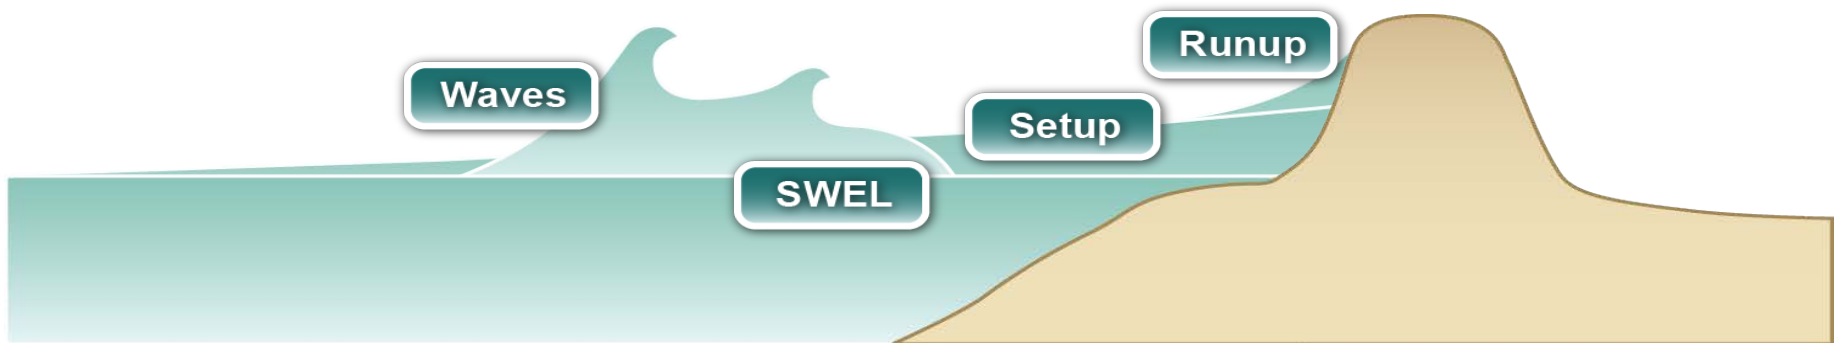

Terrain shows different slope at the shore

Changing BFEs

- **Base Flood Elevation on FIRM now includes 3 components:**

1. Storm surge stillwater elevation (SWEL) includes wave setup
2. Wave height above storm surge (stillwater) elevation
3. Wave runup above storm surge elevation (where present)

How does this apply to my community?

- **NFIP Compliance**
- **Local impact of the coastal study**

National Flood Insurance Program

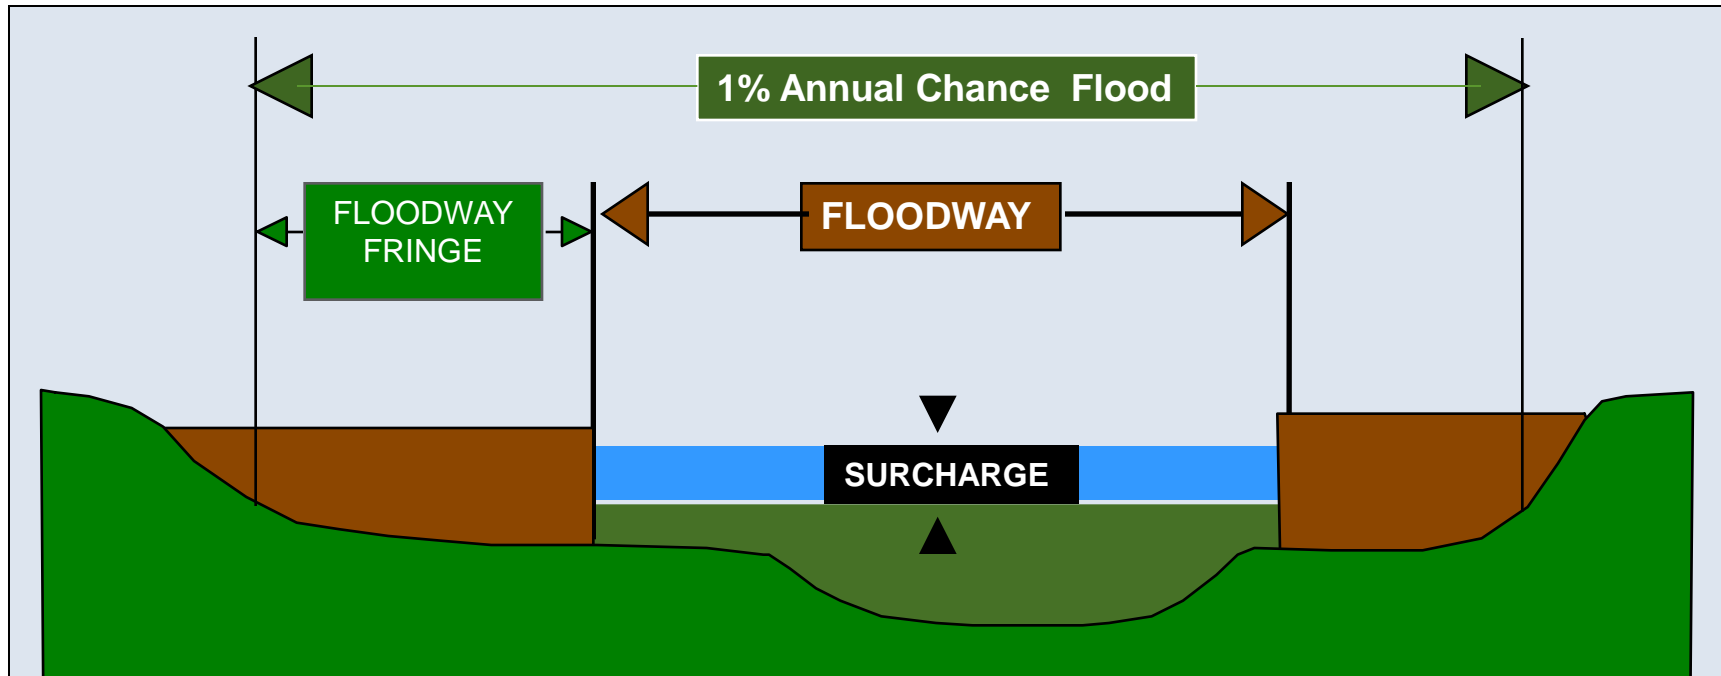

- **Allows property owners to purchase federally backed flood insurance**
- **State and local governments agree to adopt and enforce floodplain management ordinances**
- **Over 20,300 communities participate in the NFIP nationwide**
- **1,498 communities in NYS participate in the NFIP**

Standard NFIP Building Requirements

- **The lowest enclosed area, including basement must be at or above the Base Flood Elevation *plus two feet (residential)***
- **Non-residential buildings may be flood proofed in lieu of elevation (freeboard applies)**
- **NO development in the regulatory floodway that would raise flood elevations**

Floodway Schematic

FLOODWAY + FLOODWAY FRINGES = FLOODPLAIN
SURCHARGE NOT TO EXCEED 1.0 FOOT to Create Floodway
Encroachment within Floodway May Not Increase BFE By Any Amount

Standard NFIP Building Requirements

■ A Zone Building Requirements

- Where no Base Flood Elevation: Lowest floor at least 3' above highest adjacent grade
 - If have a BFE then use it
 - Developments over 5 acres or over 50 lots must provide a BFE

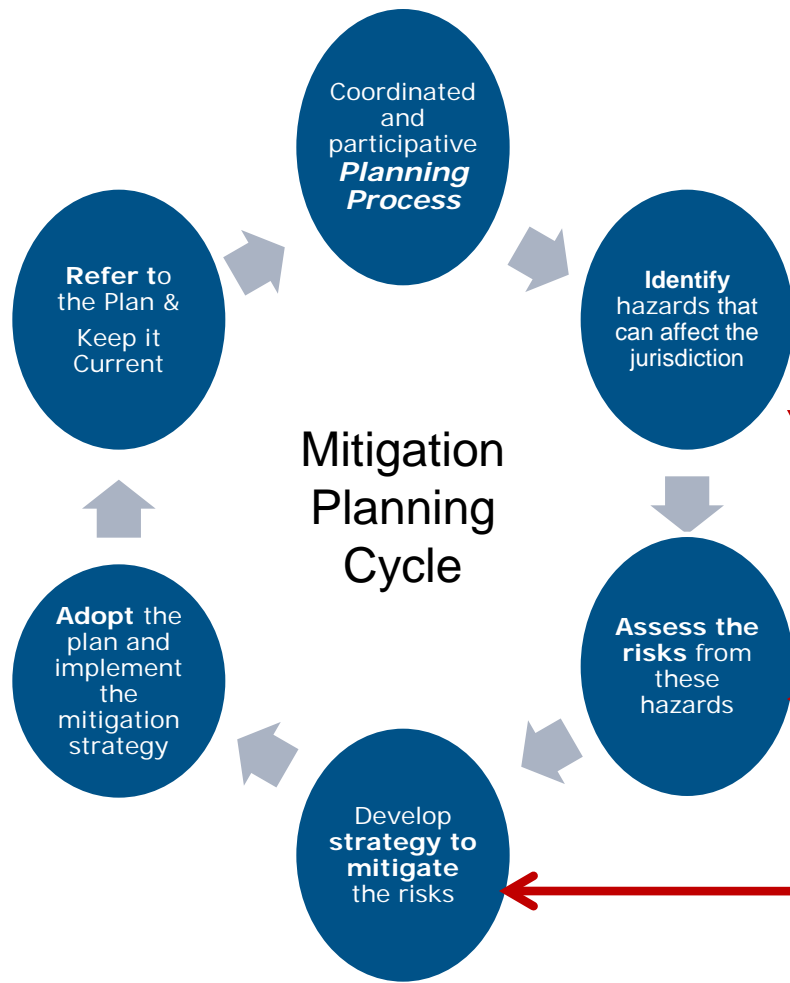

■ VE Zone Buildings Requirements

- Lowest horizontal member must be above BFE
- Structure must have open foundation, not built on fill
 - Below BFE must be free of obstructions
 - Breakaway walls are permissible

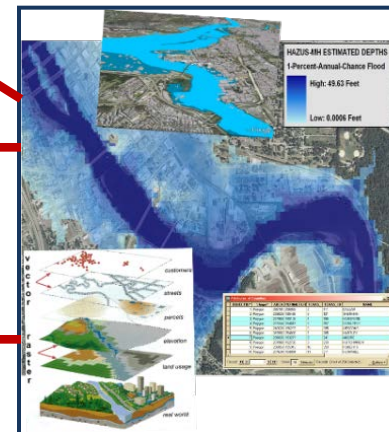

Community Rating System (CRS)

- **Flood insurance premium rates discounted to reward community actions that reduce flood losses, facilitate accurate insurance ratings, and encourage a comprehensive approach to floodplain management**
- **Class rating system from 1 to 10**
- **Each Class improvement (500 point increments) results in additional 5% discount, up to 45% in SFHAs for Class 1 communities**
- **Uniform minimum credits give you points for activities on the state level (state laws) and make achieving a Class 9 relatively easy**
- **18 creditable activities, organized under four categories:**
 - Public Information
 - Mapping and Regulations
 - Flood Damage Reduction
 - Flood Preparation
- **<http://training.fema.gov/EMIWeb/CRS/>**

Hazard Mitigation Planning

- **Risk MAP and Mitigation Planning**
 - Local hazard mitigation plans must be updated every five (5) years.
 - Use new Risk MAP information to update local HMP.
 - Flood Hazard Profile
 - Risk Assessment
 - Mitigation Strategy

Possible Mitigation Activities

Mitigation should be part of overall hazard mitigation plan

- 2 foot of freeboard for new structures.
- Cumulative substantial improvement clause.
- List of publicly owned buildings that have flood risk.
- Acquisition of flood prone structures.
- County GIS system.
- Updated weather tracking equipment.
- Stream bank stabilization projects
- Identified sanitary sewer mains vulnerable to erosion from flood
- Stream bank or shoreline stabilization projects

- Adopted a wellhead protection ordinance.
- Vulnerability assessment of water and wastewater infrastructure.
- Elevate, move and acquire flood damaged structures.
- Identify vulnerable critical facilities.
- Implement mitigation measures for repetitive loss properties.
- Require elevation of new structures and substantially improved structures.
- Natural stream restoration

Recommended Higher Standards

- **2 feet of freeboard**
- **Restrictions on hazardous material storage**
- **Regulated high risk land uses (e.g. manufactured homes/critical infrastructure)**
- **50 foot Setbacks/ Buffers**
- **Conservation/open space area**
- **Cumulative Substantial Damage/Substantial Improvement**
- **Lower threshold for Substantial Damage**
- **Subdivision design triggering flood study**
- **Prohibitions**
 - SFHA development
 - Manufactured homes
 - Fill
- **Community Identified Flood Areas**

Mitigation Grant Programs and Funding Sources

■ Federal

- Hazard Mitigation Grant Program (HMGP)
- Pre-Disaster Mitigation Grant Program (PDM)
- Flood Mitigation Assistance (FMA)
- Repetitive Flood Claims (RFC)
- Severs Repetitive Flood Claims (SRL)
- US Army Corps. of Engineers
- Natural Resource Conservation Service (NRCS)

■ State

- NYSDEC
- NYS Office of Community Renewal
- NYS Office of Emergency Management

■ Local

- Watershed Conservancy Districts
- Local taxes
- Storm water utilities

Risk Communication

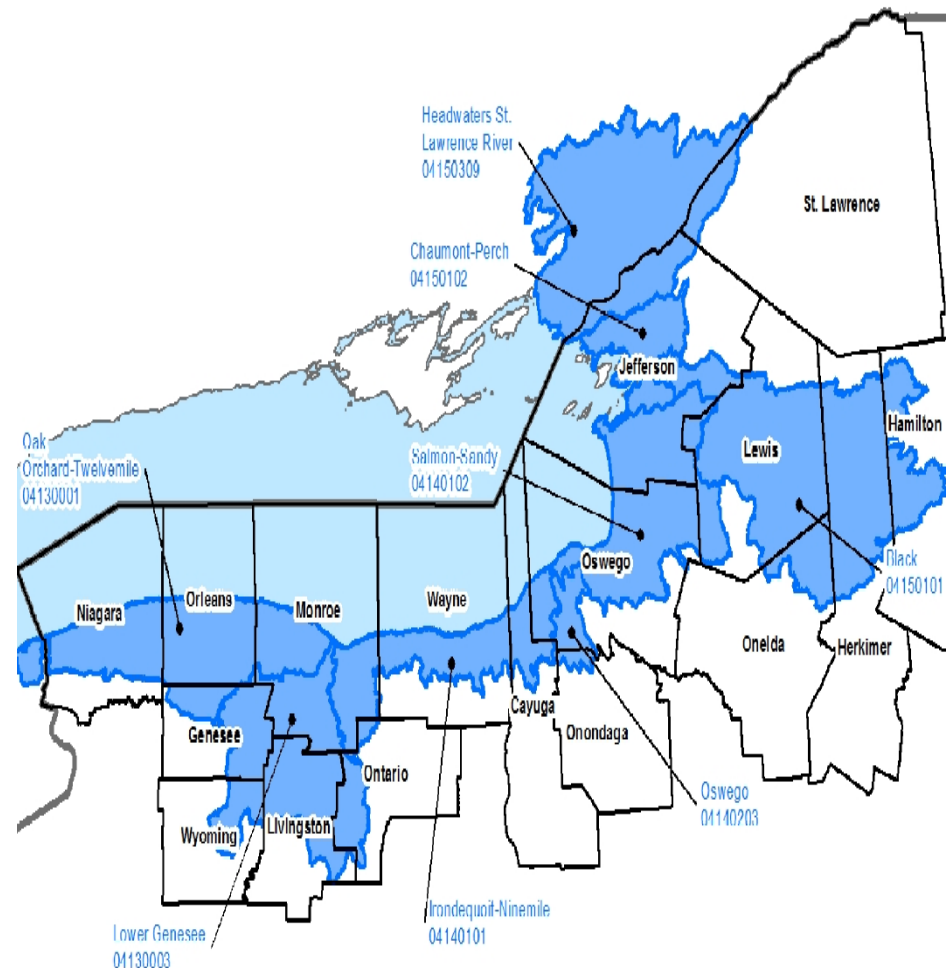

- **Federal/State/Local goals:**
 - **To reduce risk to life and property, ensure safer, sustainable communities**
 - **To effectively communicate risk and increase public awareness, leading citizens to make informed decisions regarding their risk**
- **Key factors contributing to successful achievement of these goals are:**
 - **Community engagement and exchange of flood risk information**
 - **Effective collaboration through partnerships**
 - **Strategic communications plan development**
 - **Local understanding and implementation of mitigation action and strategies**

Next Steps

- **Communities will provide additional data**
- **Dewberry will:**
 - **Finalize Discovery Map and Discovery Report and distribute to communities and other stakeholders**
 - **Update FEMA systems (Coordinated Needs Management Strategy, National Digital Elevation/Orthophotography Programs, etc.)**

Schedule

- **Today**
 - In person Meetings
- **Data worksheets Due**
 - December 31, 2013
- **Final Deliverables**
 - March 2014

Breakout Sessions

- **We want to hear from you!**
 - What are areas of recent or planned development or high growth or other significant land changes?
 - What other flood risks are there?
 - What other mitigation plans and projects are there?
- **What are your community's concerns?**
- **How can we (both FEMA and you) communicate risk within your community and increase resilience from floods?**

Resources

- **Risk Assessment, Mapping and Planning Partners:** www.RAMPP-team.com/ny.htm – Draft Discovery report, PowerPoint presentation, and maps will be posted here
